SUMMARY

Full stack developer with a never ending passion to learn more development languages and technologies. A detail oriented, problem solver and team player always willing to try new or different ways to code. 1+ years of full stack development experience and currently pursuing a Full Stack Development Certificate from The Ohio State University.

TECHNICAL SKILLS

Languages: HTML, CSS, Javascript, jQuery, Bootstrap, Node.js, Express.js, Sequelize.js, Git, MySQL

Applications: Visual Studio Code, GitHub, Heroku, Panic Nova, Terminal CLI

PROJECTS

Global Lost & Found

- Group project developed using Node.js, Express.js, and Sequelize, along with Handlebars, to create an app to help users around the world find lost items quickly and efficiently.
- Store data into a MySQL database using sequelize.
- **GitHub Repo:** <https://github.com/Youngin9210/Lost-Found>
- **Heroku Deployed App:** <https://glacial-fortress-45860.herokuapp.com/>

Tech-Blog

- An app created using Node.js, Express.js, Sequelize, Handlebars, and Bootstrap.
- Users login or signup to interact with blog posts using CRUD.
- **GitHub Repo:** <https://github.com/Youngin9210/Tech-Blog>
- **Heroku Deployed App:** <https://nameless-basin-78183.herokuapp.com/>

Note Taker

- Using Javascript, Node.js, and Express.js to create an app for users to track their notes when and wherever they would like.
- Note Taker also uses UUIDv4, an npm package that creates a unique id for an object.
- **GitHub Repo:** <https://github.com/Youngin9210/Note-Taker>
- **Heroku Deployed App:** <https://lit-headland-57656.herokuapp.com/>
